## Class A/B Operator Services

As you know, anyone that owns or operates an Underground Storage Tank (UST) must designate a Class A, Class B and Class C operator for each facility. Dependable has developed the following program to provide Class A/B services for UST owners and operators.

Dependable's Class A/B Operator will come to your facility to perform the following compliance activities:

### Initial Set Up & Site Visit

- Meet with the designated facility contact person. This person will be the contact person that the Class A/B Operator will communicate with
- Review current permits and licenses to make sure they are current and available
- Review current record keeping for completeness
- Review compliance testing records and determine retest dates
- Perform a UST inspection with the facility contact person
- Provide and review a UST inspection check list that will be performed by onsite personnel
- Train Class C Operators for the facility
- Fill out the required Operator Training paperwork / records

### Routine Inspections

- Dependable personnel will come to the facility once every month to conduct an inspection of the facility and UST records
- Dependable will review the results of the inspection with the facility contact person
- Dependable will make recommendations to the facility contact person in order to keep the facility in compliance
- The Class A/B Operator will be available to answer questions and give support over the phone

Dependable can also assist with MassDEP or other regulatory inspections.

To speak with a Dependable Petroleum professional regarding your specific AST needs, please feel free to contact us directly at 800-322-0360, or visit our website [www.dependablecompany.com](http://www.dependablecompany.com)
