Aboveground Storage Tank (AST) Monthly Inspection

Dependable Petroleum Services provides monthly and annual AST inspections:
Dependable inspectors are knowledgeable and experienced with all aspects of AST,
operations and maintenance. The following items are part of Dependable's monthly inspections:

Accessibility: The tank and equipment need to accessible clear of any clutter for inspections and incase of clean up in the event of a leak or spill.

Safety Equipment: All safety equipment is in place and all safety precautions are followed

Security: Verify security measures are in place to prevent vandalism

Maintains: Storage tanks including day tanks. Larger storage tanks should be maintained properly. These items are important components to check:

- Vents, Gauges and overfill devices, Paint, Soundness, Tank Signs, Foundation.

Tank Piping and Hoses: leaks are commonly found in poorly maintained pipes.

- Valves, Nozzles, Supports. Coating, paint, and wraps, Corrosion protection, Soundness.

Secondary containment: The ability of secondary containment to hold any product during a spill is critical. Check these factors: Size, Dry and Clean, Liner.

Spill Preventions and Response: You can reduce environmental damage and save money by preparing for an oil spill. Here are the items you will need:

1. Response Plan: Operators and workers should be trained in how to deal with emergencies. Response plans must be posted in each area that contains fuel.
2. Responses Equipment: Facility operators should know how to use oil spill response equipment and where it is located. Locate equipment near the storage tanks in good working condition?

To speak with a Dependable Petroleum professional regarding your specific AST needs, please feel free to contact us directly at 800-322-0360, or visit our website **www.dependablecompany.com**
